

Programme for 2020 -21

ART PRACTICAL C Wednesday 10.30

Steve Stephens

Have you always wanted to be an artist? I did too, until I discovered that the primary qualification was to have been dead for over 100 years. Now I am happy just to produce pictures. I have been asked to point out that we are not an unruly rabble, just relaxed. To everyone's surprise, their pictures usually improve.

Co-ordinators of the Practical Art classes below are in touch with their members at home. They are sharing their results with each other and we publish samples on our weekly Updates.

Topics covered will include Stayman, transfers, doubles, Michaels, Blackwood, Gerber and unusual 2NT. Lessons include some theory followed by prepared and random hands to reinforce the topics taught.

BRIDGE: Lower Intermediate Wednesday 14.00

Naomi Stuart

The class is aimed at those with about two or three years' experience of bridge and a basic understanding of Acol. Notes and prepared hands are emailed in advance. We spend time at the beginning of each lesson on a principle of bidding or play using a PowerPoint

presentation. Then we discuss the hands practising these principles.

BRIDGE: Supervised Bridge for Intermediate Players Tuesday 10.30 Robert Clifton

Supervised Bridge play and discussion for duplicate Bridge players to encompass both Acol and Standard American systems (separately) for those who are Intermediate players and also for those who would like to improve upon this. Each week, I will distribute hands for everyone to play (with my help if necessary), and then we will go through the hands to see if the bidding and the play achieved the best outcome. Each person will get the same hand to bid and play as everyone else for each deal so that we can evaluate the hand with every participant at the same time.

BRIDGE: Supervised Bridge Wednesday 10.30 Tony Mavropoulos

This class will help in learning and understanding the main aspects of bidding, declarer play and defence. It will include some advanced topics and a variety of resources.

BRIDGE: Intermediate Thursday 11.30 David Powell

Generally, we progress from basic to more advanced concepts in two-week 'units'. A topic is introduced and discussed one week, then in the following week we look at the bidding and play of some interesting hands, sometimes, but not always, illustrating what has been discussed in the previous week. At the beginning of the year important aspects, notably opening leads, are revised. Subsequently, topics focus on aspects of the game not always covered in beginners' classes, such as transfers, losing trick count, weak two bids, re-opening doubles, Jacoby 2NT, Michaels cue bids, unusual NT, Roman key-card Blackwood, and others.

Bridge: Intermediate Tuesday 14.00 Peter Nash

This class is aimed at those with a good understanding of Acol. It will cover systematically the key aspects of bidding, declarer play and defence including more advanced topics useful for duplicate bridge. Notes will be emailed out in advance and there will be quizzes to reinforce what has been learned. The classes may evolve depending on class feedback, and there will be some opportunity to discuss hands or issues raised by class members.

MEDICINE AND THE ARTS -TWIN PILLARS? Tuesday 12.00

Michael Baum

The limits of science in the practice of medicine. Science and the Arts are the twin pillars on which our Western culture is based, yet they are polarised by our educational system. I believe that the Arts-Science dichotomy is fallacious as both are integral to the practice of modern medicine. Amongst the German doctors indicted at Nuremberg for crimes against humanity, many were men of refined culture, but making a humane physician means more than enjoying a night at the opera! I discuss the practical applications of scientific philosophy, theology, literature/theatre and fine art for the enhancement of medical education.
